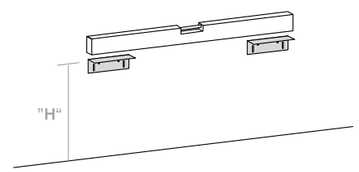
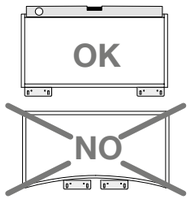
3 Posizionare le staffe angolari all’altezza determinata in precedenza verificando l’allineamento con l’ausilio di una livella, seguendo i criteri espressi in **Figura 4.**
Place the angle brackets at the previously determined by checking the alignment with the aid of a spirit level, according to the criteria given in Figure 4.

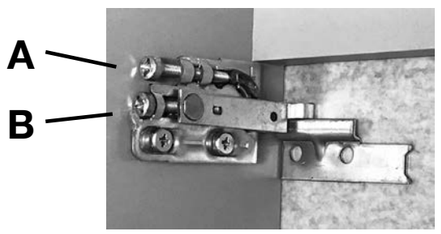


4 Posizionare le staffe angolari in prossmità del fianco affinchè il peso non gravi in modo eccessivo sul fondo poichè potrebbe causarne la deformazione.
Place the angle brackets in prossmità the side so that the weight does not interfere excessively on the bottom as it may cause deformation.



5 Spezzare le barrette di sostegno (che trovate all’interno del collo) e predisporre i fissaggi alla parete posizionandoli in funzione alle **attaccaglie** montate sul mobile.
Breaking the backing strips (found in the neck) and prepare the fixings to the wall by placing them according to the hangers mounted on the cabinet.

6 Eventualmente aggiustare la messa in bolla del mobile agendo sulla vite “**A**” e quindi accostare il mobile mediante la vite “**B**”.
If necessary, adjust the leveling of the cabinet by turning the screw "A" and then pull the cabinet by means of the screw "B".



7 Fissare definitivamente la base lavabo al muro utilizzando i 2 fori predisposti (sulla barra retrostante la base) per l’inserimento di 2 tasselli con relative viti.
Permanently attach the base to the wall using the washbasin 2 holes (on the bar behind the base) for the insertion of two anchors with screws.

8 Per garantire il fissaggio e l’impermeabilità del prodotto si raccomanda di usare silicone neutro nei punti di aderenza.
To ensure the fixing and the permeability of the product is recommended to use neutral silicone grip points.

TECHNOTECK

TECHNOTECK

FINITURE *FINISHES*

BIANCO OPACO	BIANCO LUCIDO

Technoteck è un solid surface di ultima generazione, acrilico colorato in massa senza cariche minerali che danno al prodotto una maggiore flessibilità di realizzazione di forme e superfici.
Tra le sue peculiarità, spicca senz'altro l'ottima resistenza all' urto, inattaccabilità dai raggi uvb, la resistenza del colore nel tempo (non vira tonalità e non ingiallisce). Inoltre, Technoteck è resistente all'assorbimento di alcuni prodotti cosmetici e di bellezza, tipici nell'utilizzo del materiale nell'arredo bagno.

INSTALLAZIONE: per la corretta installazione dei piani in Technoteck devono essere rigorosamente utilizzati siliconi neutri trasparenti non acetici, per evitare la corrosione della superficie.

PULIZIA E MANUTENZIONE:
Technoteck opaco:
Per la normale pulizia quotidiana dei piani lavabo in Technoteck opaco usare spugna in scotch brite e detersivi in polvere abrasivi e risciacquare con acqua. Per asciugare usare panni in microfibra.
Non usare alcool, acetone o altri tipi di solventi. In caso di caduta accidentale di solventi, risciacquare velocemente con acqua.

Technoteck lucido:
Per la normale pulizia quotidiana dei piani lavabo in Technoteck lucido usare panni o spugna umidi e detersivi liquidi che non contengano particelle abrasive e risciacquare con acqua. Per asciugare usare panni in microfibra.

NON USARE assolutamente detersivi abrasivi, alcool, acetone o altri tipi di solventi (perchè danneggiano il materiale) in caso di caduta accidentale di tali solventi risciacquare velocemente con acqua. Per mantenere brillante la superfice, applicare periodicamente del comune polish.

Technoteck is a latest-generation solid surface acrylic material without mineral loads that give the product greater flexibility in the production of particular shapes and surfaces.
Among its distinguishing features, mention must be made of its outstanding shock-resistance, its resistance to uvb rays, its colour fastness in time (no changes in shade and no yellowing). In addition, Technoteck withstands absorption of certain cosmetics and beauty products, which are typical when using this material in bathroom furnishings.

INSTALLATION: for proper installation of Technoteck tops, neutral transparent non acetic silicones must under all circumstances be used to avoid corrosion of the surface.

CLEANING AND MAINTENANCE:
Technoteck matt:
For the normal daily cleaning of the washcloths in Technoteck matt, use sponge in brushed scotch and abrasive powder detergents and rinse with water.
Do not use alcohol, acetone or other types of solvents to dry with microfibre cloths. In case of accidental fall of solvents, rinse quickly with water.

Technoteck glossy:
For the normal daily cleaning of wash basins in Technoteck glossy, use damp cloths or damp sponges and liquid detergents that do not contain abrasive particles and rinse with water. To dry, use microfiber cloths.

DO NOT USE abrasive detergents, alcohol, acetone or other types of solvents (because they damage the material) in case of accidental fall of such solvents, rinse quickly with water. To maintain the surface bright, periodically apply the common polish.

TECHNOKARM ®

TECHNOKARM ®

FINITURE *FINISHES*

BIANCO OPACO

Technokarm ® è un materiale composto da circa 2/3 di idrossido di alluminio e 1/3 da acrile di alta qualità, colorato in massa. Il processo di produzione costantemente controllato, consente di ottenere un prodotto omogeneo in tutto il suo spessore, e quindi sempre riparabile. Mantiene inoltre la forma e offre un'ottima resistenza agli urti, al calore ed ai più comuni agenti chimici.
Technokarm® è biologicamente puro e non poroso, quindi non assorbe sporco e germi. Eventuali graffi o macchie possono essere rimossi semplicemente con la spugnetta abrasiva in dotazione ad ogni lavabo e/o top forniti.

INSTALLAZIONE: Per la corretta installazione dei piani in Technokarm ® devono essere rigorosamente utilizzati siliconi neutri trasparenti non acetici, per evitare la corrosione della superficie.

PULIZIA E MANUTENZIONE: Per la pulizia dei piani in Technokarm ® dalle macchie, dal calcare e dallo sporco, è sufficiente e consigliato pulire la superficie con acqua saponata o con comuni detergenti non abrasivi: utilizzare panni morbidi di cotone. Nel caso di graffi o macchie persistenti utilizzare la spugna abrasiva (in dotazione con l'acquisto del piano), oppure carta abrasiva grana 1000.

DA EVITARE: Consigliamo di evitare prodotti come ad esempio: trielina, acetone e prodotti chimici particolarmente aggressivi. Inoltre consigliamo di evitare l'appoggio di oggetti roventi e sigarette.

Technokarm® is a material made up of approximately 2/3 aluminium hydroxide and 1/3 top-quality acryl. The constantly controlled manufacturing process makes it possible to achieve a uniform product across its entire thickness, which means it can always be repaired. In addition, it is form-stable and offers outstanding resistance to shocks, to heat, and to the most common chemical agents. Technokarm® is biologically pure and non porous, so it does not absorb dirt and germs. Any scratches or stains are simple to remove using the abrasive sponge supplied with every wash basin and/or top ordered.

INSTALLATION: For proper installation of Technokarm® tops, neutral transparent non acetic silicones must under all circumstances be used to avoid corrosion of the surface.

CLEANING AND CARE: To clean spots, dirt and limescale off Technokarm® tops, simply wipe with surface with soapy water or everyday non-abrasive detergents, using a soft cotton cloth. In the event of persistent dirt or scratches, use the abrasive sponge (supplied with the top at the time of purchase) or abrasive paper with 1000 grit.

AVOID: We recommend you avoid products such as: trichloro-ethylene, acetone and particularly aggressive chemicals. In addition, we recommend you avoid placing piping hot products and cigarettes on the surface.

HPL

HPL

FINITURE *FINISHES*

Il laminato Unicolor HPL è realizzato ad alta pressione: è costituito da fogli di cellulosa stratificati impregnati e da carte decorative melaminiche unite sfruttando pressione a calore. Il retro viene levigato per renderlo adatto all'incollaggio.

PULIZIA E MANUTENZIONE: Il laminato Unicolor HPL è un materiale particolarmente igienico, che non richiede manutenzione specifica, al di là delle normali operazioni di pulizia. La superficie non porosa dell' HPL è facilmente disinfettabile con acqua calda, vapore e con tutti i tipi di detergente domestico e disinfettante, purchè non fortemente alcalini. E' antistatico, quindi in assenza di cariche elettrostatiche non attira polvere.

IGIENE: Il laminato Unicolor HPL è di facile pulizia e manutenzione e la normale pulizia avviene asportando dalla superficie gli sporchi con detergenti domestici.

DA EVITARE: Si sconsiglia l'utilizzo di prodotti abrasivi, cerati e candeggianti, oltre a detergenti chimici con basi o acidi forti.

Unicolor HPL laminate is produced at high pressure: it consists of resin impregnated cellulose layers and decorative melamine papers which are consolidated under heat and high pressure. The back is smoothed to make it suitable for bonding.

CLEANING AND CARE: unicolor hpl laminate is a particularly hygienic material, which requires no specific maintenance, beyond routine cleaning operations. The non-porous surface of HPL is easy to disinfect with hot water, steam and all sorts of domestic. Detergents and disinfectants, provided they are not strong alkalis. It is anti-static, so due to the absence of electrostatic charges, it does not attract dust.

HYGIENE: unicolor HPL laminate is easy to clean and care for and routine cleaning involves removing dirt from its surface using domestic detergents.

AVOID: we advise against the use of abrasive, wax-based or bleach products, as well as strong acidic or alkaline chemical detergents.

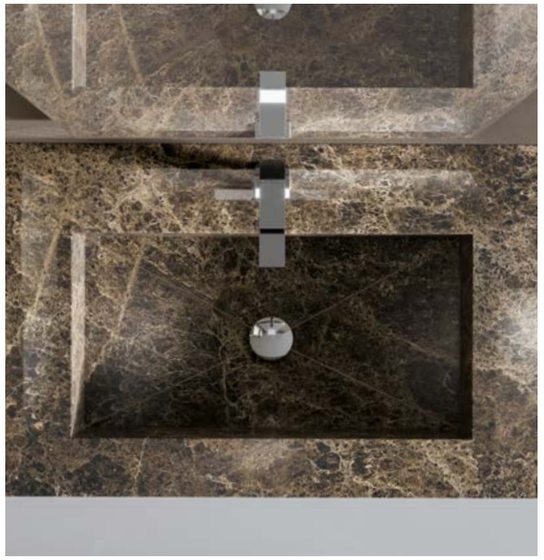
GRES LAMINAM®

STONEWARE



GRES FASCIA “B” - FINITURA OPACA *STONEWARE CATEGORY “B”- MATT FINISH*

GRES FASCIA “C” - FINITURA LUCIDA *STONEWARE CATEGORY “C”- GLOSSY FINISH*

Il Piani in Gres Laminam è un tipo di ceramica molto resistente, con una bassa porosità particolarmente adatto all’uso quotidiano.
Il Gres è composto da un’argilla plastica e lavorabile i cui ingredienti base sono l’argilla, feldspato e quarzo. L’argilla che viene usata per la produzione del Gres ha la capacita di resistere alle alte temperature (fino a 1250°C).

INSTALLAZIONE: Per la corretta installazione dei piani in Gres Laminam devono essere rigorosamente utilizzati siliconi neutri trasparenti non acetici, per evitare la corrosione della superficie. Al termine dell’installazione si consiglia di effettuare un trattamento protettivo antimacchia (Prodotto consigliato “FILA MP/90”).

PULIZIA E MANUTENZIONE: Per la pulizia dei piani in Gres si consiglia l’utilizzo di un panno morbido inumidito con dell’acqua. Macchie di origine acida (Prodotti cosmetici o simili), si possono togliere stendendo un velo di “FILAKRISTAL”, che una volta asciugato deve essere rimosso con una spugna. Residui di calcare possono essere rimossi con l’utilizzo del “POLISH” (Formula marmo).

DA EVITARE: Consigliamo di evitare l’utilizzo di pagliette abrasive e prodotti come ad esempio: trielina, acetone e prodotti chimici particolarmente aggressivi. Inoltre si consiglia di evitare l’appoggio di oggetti roventi e sigarette.

The Laminam Stoneware is a very durable ceramic type with a low porosity particularly suitable for everyday use. Stoneware consists of plastic clay that can be plied easily, the ingredients of which are clay, feldspar and quartz.
The clay used to produce Stoneware is capable of withstanding high temperatures (of up to 1250°C).

INSTALLATION: For proper installation of Stoneware tops, neutral transparent non acetic silicones must under all circumstances be used to avoid corrosion of the surface. Upon completion of installation, we advise you apply a stain-proof protective treatment (Recommended product “FILA MP/90”).

CLEANING AND CARE: To clean Stoneware tops, we recommend you use a soft cloth dampened with water. Acidic stains (cosmetics or similar products) can be removed by applying a thin layer of “FILAKRISTAL” then removing it with a sponge once dry. Limescale residue can be removed using “POLISH” (marble formula).

AVOID: We recommend you avoid using abrasive pads and products such as: trichloroethylene, acetone and particularly aggressive chemicals. In addition, we recommend you avoid placing piping hot products and cigarettes on the surface.

Il Cemento è un materiale composto da vari polimeri all'acqua mono componenti, minerali e pigmenti totalmente ecocompatibili. Il risultato è quello di un prodotto: ignifugo, flessibile, traspirante ed antistatico con un'ottima resistenza allo sporco e alle macchie, compatto e privo di giunzioni in tutto lo spessore. Questo gli conferisce un altissimo grado di igienicità e impermeabilità, caratteri che lo rendono un prodotto ideale per il rivestimento anche dei top.

Cement is a material consisting of various single component water-based polymers, minerals and totally eco-compatible pigments. The result is a product that is: flame-retardant, flexible, breathable and anti-static, with outstanding resistance to dirt and stains, compact and joint-free across its entire thickness. This gives it a superior degree of hygiene and waterproofness, characteristics that make it perfect for covering tops too.

INSTALLAZIONE: Per la corretta installazione dei piani in Cemento devono essere rigorosamente utilizzati siliconi neutri trasparenti non acetici, per evitare la corrosione della superficie.

INSTALLATION: For the correct installation of cement tops neutral non-acetic transparent silicones must be strictly used, to avoid corrosion of the surface.

PULIZIA E MANUTENZIONE: Per la pulizia dei piani in Cemento dalle macchie, dal calcare e dallo sporco, è sufficiente e consigliato pulire la superficie utilizzando un panno in microfibra con normali detergenti neutri non schiumogeni e senza solventi.

CLEANING AND MAINTENANCE: cleaning the surface by using a microfiber cloth with normal neutral, non-foaming and solvent-free cleaners for cleaning the concrete tops from the stains, the lime and the dirt, is clean and recommended.

DA EVITARE: Consigliamo di evitare prodotti come ad esempio: trielina, acetone e prodotti chimici particolarmente aggressivi. Inoltre consigliamo di evitare l'appoggio di oggetti roventi e sigarette.

TO AVOID: we recommend to avoid products as for example: trielina, acetone and particularly aggressive chemicals. We also recommend to avoid the support of hot objects and cigarettes

NOTE IMPORTANTI
IMPORTANTS NOTES

1) NEL CALCOLO DEL PIANO, CONSIDERARE SEMPRE UNA **MAGGIORAZIONE DI 0,6 CM** DI SPORGENZA RISPETTO ALLA LARGHEZZA TOTALE DELLE BASI (0,3 SX + 0,3 DX).
ESEMPIO:
BASE L.70 + BASE L.50 = L.120 BASE TOTALE
SOMMANDO LA SPORGENZA COME SOPRA INDICATO, LA DIMENSIONE DEL PIANO SARÀ L.120,6 CM

2) SEGNALARE SEMPRE SE IL DI MOBILE VA IN **NICCHIA** O APPOGGIATO A **MURO DA UN LATO**.

3) **INVIARE SEMPRE LA SCHEDA TECNICA/DIMA DEL LAVABO** CON POSIZIONAMENTO FORO MISCELATORE.

4) IN PRESENZA DI MISCELATORE A MURO **INVIARE SEMPRE LA SCHEDA TECNICA/DIMA** DEL MISCELATORE SCELTO.

5) NEL CALCOLO DEI PIANI SCATOLATI È OBBLIGATORIO SEMPRE L' **INSERIMENTO DELLE STAFFE DI SUPPORTO**

6) TUTTI I PIANI DI FINITURA, PER LAVABO APPOGGIO / SOPRAPIANO E/O CON VASCA INTEGRATA, SEGUONO LO STESSO METODO DI CALCOLO: TOP AL CM. + FORO LAVABO O VASCA INTEGRATA.

1) IN THE CALCULATION OF THE TOP, ALWAYS CONSIDER AN INCREASE OF 0.6 CM OF PROJECTION COMPARED TO THE TOTAL WIDTH OF THE BASES (0.3 LEFT + 0.3 RIGHT).
EXAMPLE:
BASE W.70 + BASE W.50 = W.120 TOTAL BASE
BY ADDING THE PROJECTION AS ABOVE INDICATED, THE DIMENSION OF THE TOP WILL BE 120.6 CM
2) ALWAYS REPORT IF THE FURNITURE GOES TO THE RECESS OR LAYED ON THE WALL ON ONE SIDE.
3) SEND ALWAYS THE TECHNICAL SHEET / TEMPLATE OF THE WASHBASIN WITH POSITIONING OF THE MIXER HOLE.
4) IN THE PRESENCE OF A WALL-MOUNTED MIXER ALWAYS SEND THE TECHNICAL SHEET / TEMPLATE OF THE SELECTED MIXER.
5) IN THE CALCULATION OF THE BOXED TOPS IT IS ALWAYS REQUIRED TO INSERT THE SUPPORT BRACKETS
6) ALL THE FINISHING TOPS, FOR SIT-ON BASIN, BUILT-IN / UNDERMOUNT BASIN AND / OR WITH INTEGRATED TANK, FOLLOW THE SAME METHOD OF CALCULATION: TOP PER CM. + WASHBASIN HOLE OR INTEGRATED TANK.
